

Gas Analyser CGP700 Range

The Crypton CGP700 is a completely integrated MOT gas analyser. It combines state of the art technology with Windows™ based programs. To test today's petrol vehicles you need a VOSA approved catalyst emission tester with a program that can be easily updated as legislation changes, a vehicle database that is simple to update combined with an analyser that is economical to buy, easy to use and reliable.

The unit comes complete with oil temperature probe, battery RPM Measurement, A4 printer, black keyboard, remote control and 19" Flat screen monitor as standard all housed in a high quality roll-around cabinet as standard.
