

MoT Packages

Class IV and Class VII

CR2123
07-09-05

The new 'full service' approach to workshop layout and installation of Crypton MOT bays.

The MoT Package for Class IV and VII includes a Roller brake tester, Vehicle lift, headlamp aligner, jacking beam, turn plates, a petrol and diesel emission analyser.

As part of the package we offer free advice, a technical drawing of bay layout, help when submitting plans to VOSA, installation and calibration of the various elements and on going after-sales product support.

The Company reserves the right to introduce improvements in design or specification without prior notice
